Mouse Shapes

Ellen Stoll Walsh
Creator of *Mouse Print* and *Mouse Count*

Look for Shapes!

Discover the world of shapes.

1. Find a shape book at the library, like *Round is a Tortilla* by Roseanne Greenfield Thong, *City Shapes* by Diana Murray, or *Shapes All Around* by Kate Riggs.
2. Talk about the shapes in the book, pointing them out and naming them.
3. Look around your house or neighborhood and see how many shapes you can find!

What this is teaching:

Recognizing the differences in shapes helps your child to distinguish differences between letters later on.
