

# FLUENCY

is the ability to read with speed, accuracy and proper expression.

# Mission: READ!

## ECHO READING

**Materials Needed:** There are many ways to use Echo Reading. The goal is to have your child hear their own voice reading aloud. You can use a phone or tablet to record and play back. Students can use a Toobaloo Auditory Feedback Reading Phone, or a PCVC elbow to read into in order to hear their voice.

**Directions:** An echo allows a child to hear their own voice. A Toobaloo Auditory Feedback Reading Phone is a great reading tool. Your reader will hear their voice, holding it like a telephone.

Listening to the words as they say them reinforces that they are reading smoothly, with expression and proper pronunciation, and changing the tone at the end of a sentence. Recording on a device and playing back will also allow your child to hear their own voice and read aloud with themselves! Echo Reading is also a great way to practice speaking the way a character in the book would speak.
