

Nook ereaders

Getting started with Overdrive on Nook Simple Touch, the original Nook Glowlight, the Nook Glowlight 3, the Nook Color and the original Nook Tablet

On some NOOK ereaders (which include black-and-white-screen devices like the NOOK Simple Touch, original NOOK Glowlight and Glowlight 3) and on the earliest NOOK tablets (the NOOK Color and original NOOK Tablet), you can transfer library ebooks from a computer using Adobe Digital Editions. While the NOOK Color and original NOOK Tablet are technically tablets, they work like ereaders with OverDrive. Learn how to get started with these NOOK devices here.

Getting started

1. Install and authorize Adobe Digital Editions (ADE) on your computer.
2. Connect your ereader to your computer.
3. On your computer, open your library's digital collection at www.kdl.overdrive.com.
4. Borrow an ebook (you'll need to sign into your library to complete this step).
5. Click the **Download** button for the borrowed ebook.
6. Downloaded ebooks open in ADE.
7. To transfer an ebook to your ereader,
 - Open the "Library" view in ADE (click the Library button in the top-left corner, if needed).
 - From there, drag and drop the ebook into your ereader, which should appear on the left under "Devices."
 - You may need to accept a file-transfer prompt on your ereader in order for it to appear in ADE.
8. Once you've transferred a library ebook, you can read it on your device just like any other ebook.

Note: During the transfer process, your ereader will be automatically authorized with the same Adobe ID or OverDrive account you used on your computer.
